Election/Restrictions

- This application is in condition for allowance except for the presence of claims 1-33 and 71-73 to Groups that are non-elected without traverse. Accordingly, claims 1-33 and 71-73 have been cancelled.

EXAMINER'S AMENDMENT

- An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.
- The application has been amended as follows: Claims 1-33 and 71-73 are cancelled.

REASONS FOR ALLOWANCE

- The following is an examiner's statement of reasons for allowance: The present invention is directed to an interactive image system for allowing a viewer to interact with a displayed image so as to cause the displayed image to change with regard to a desired effect. Each independent claim identifies the uniquely distinct feature, "for accessing an interactive image, wherein said interactive image comprises of a set of representative images, which depict a scene with one or more image parameters varying between images, inputting an interaction mode selection made by the viewer and implementing the mode of interaction by displaying one of said representative images, or a modified version thereof, on the image display device in accordance with requirements of the selected mode of interaction". The closest prior art, Laidlaw et al. (USPAP 2003/0234781 A1), disclose method, system and computer program product for rendering volumetric multi-valued primary data, the system includes a rendering engine having an input coupled to a source of multi-valued primary data and an output coupled to a display. The rendering engine includes a data processor for calculating additional data values

from the primary data, deriving at least one visual representation from the primary data and the additional data values, and mapping the derived visual representation through transfer functions to hardware primitives for volumetrically rendering the derived visual representation to provide a visualization; while Pea et al. (USPAP 2004/0125148 A1), disclose methods and apparatus for interactive point-of-view authoring of digital video content, either singularly or in combination, fail to anticipate or render the above underlined limitation obvious.

- Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
